Overview of Presentation

- Overview of Programs
 - IOWA Centers for Enterprise
 - Oakdale Research Park
 - Technology Innovation Center
 - Center for Advanced Drug Development
- Review of GIVF and Battelle Projects
- Highlighted Projects
 - UI Life Sciences Business Incubator (BioVentures Center)
 - Optherion

owa Centers for Enterprise

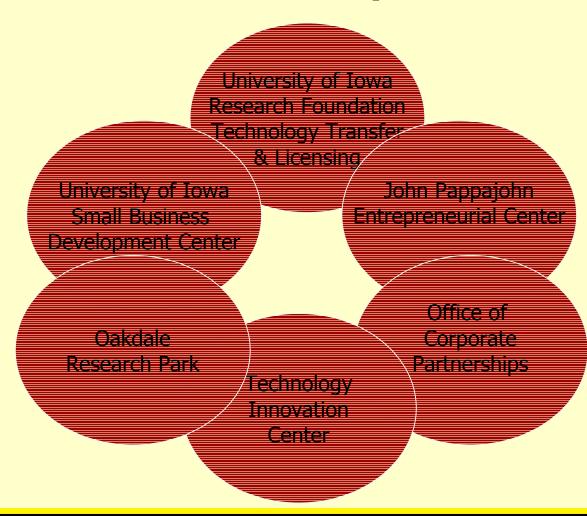

Be remarkable

What are the IOWA Centers for Enterprise?

- ➤ An integration of existing economic development activities at The University of Iowa
- ➤ Providing a comprehensive program that promotes economic development and technology transfer.
- ➤ Housed <u>together</u> in new facilities at <u>center of the campus</u>, improving <u>access</u> and <u>integration</u> of services.

EDUCATE

INNOVATE

How are the Economic Development Appropriations used at the University of Iowa?

	The total Economic Development Appropriation	in	FY2008
to	The University of Iowa was \$247,005.		

These funds provide part of the support we need for:

- ☐ Operation of **Oakdale Research Park** and its **Technology Incubation Center** where new businesses can be established.
- □ Operation of one important "magnet laboratory" **Center for Advanced Drug Development** (CADD) that is of special interest to attracting and supporting biotech and pharmaceutical companies.

EDUCATE

INNOVATE

Be remarkable

- Forty active Iowa companies are affiliated with the research park and innovation center.
- •These companies plus 4 UI anchor labs employ almost 1,800 employees earning an average salary of nearly \$60,000. Annual payroll of more than \$100 million.
- •Labor-shed includes <u>21 Iowa counties</u> and <u>65 Iowa communities</u>—approximately one-fifth of Iowa.
- •New Life Sciences Incubator under construction.

FY08 Labor Shed for Affiliated Companies and Labs **UI Oakdale Research Park and Technology Innovation Center**

How are the GIVF Appropriations used at the University of Iowa?

■The total GIVF appropriation (plus 1:1 match) in FY2008 to The University of Iowa was \$1.925M.

These funds provide part of the support we need for:

I-START: <u>Immediate or short term needs</u> designed to directly facilitate university-private sector partnerships in entrepreneurship and the creation of new companies and jobs in Iowa.

I-GROW: <u>Middle to long term commitments</u> needed to promote and sustain high tech entrepreneurship in the region and build new networks of technical-financial-business capabilities.

lows Centers for Enterprise

Be remarkable

Phase I Program: I-START (\$1,500,000).

- Operations support for IOWA Centers for Enterprise
- Gap funds for new UI spin-out opportunities
- New life sciences incubator facility
- cGMP facilities for Center for Biocatalysis and Bioprocessing
- Facilities for Optherion (leased by the company)
- Research Park business & infrastructure development
- Entrepreneurs-in-residence to advance UIRF commercialization efforts

lowa Centers for Enterprise

Gap Funding for Commercialization

- Low Cost Retinal Camera (iOptics)
- Non-invasive Glucose Detection (ASL Analytic)
- Drugs for Cancer Treatment (Terpenoid Therapeutics)
- Cell Therapy for Human Diseases (RepGenix)
- •Animal Models of Human Diseases(Exemplar Genetics)
- •Neurological Diseases and Cancer (Newco)
- ■Touch Screen Device (OMR Sensors)
- Breathalyzer for Glucose Monitoring (Znovation)

18 Companies or "Pre-companies" in place with GIVF, Battelle assistance

lowa Centers for Enterprise

Entrepreneurs-in-Residence

Rich Lineback Asoyia – Exec Mgmt

(12/07) Pearson – VP

Software and Engineering Expertise

Bob Karr, MD 2 Biotech Start-ups

(Agreed) Pfizer – Sr. Strategy Executive

UI, Wash U Professor (18 yrs)

Scheer & Co Development Company

(Agreed) Led Optherion Deal

Randy Weiss, PhD Triathalon Medical Ventures Partner

(6/07) Development Company

low Centers for Enterprise

I-START New Ventures Successes

Optherion Closed \$37M Series A, Hired CEO

■Terpenoid CEO (Bob Karr) signed on; will lead Series A

Phase 1 STTR and Phase 1 SBIR awards

■ASL Anal. \$1M NIH STTR Grant

Santos Exec-in-Residence hired to lead effort

lowa Centers for Enterprise

How are the Battelle Appropriations used at the University of Iowa?

- The total "Battelle" appropriation in FY2007 to The University of Iowa was \$8.41M.
- \$2,000,000 For creation of an endowed entrepreneurial professorship- and/or to attract world-class, entrepreneurial talent in the core Battelle platforms.
- \$2,720,000 To develop a new Technology Incubation Center and Research Park at the Oakdale Research Campus.
- \$3,690,000 For continued <u>investments in the development of core platforms</u> and expansion of the "Gap/Seed Fund" program.

EDUCATE

INNOVATE

Battelle Projects

- Platform Proposals
 - Transgenic Cells for Targeted Therapy (RepGenix)
 - Peptides for Cancer Diagnosis/Treatment (BioSynthema)
 - Neuro-Musculoskeletal Training System (StandAide)
 - Bio-Imaging for FDA Clinical Trials (VIDA Diagnostics)
 - Swine Models of Human Disease (Exemplar Genetics)
 - Development of Cancer Therapeutic (Terpenoid Therapeutics)
 - Immune System Stimulators and Suppressors
 - Renovation of Laboratory Space for Center for Advanced Drug Development (Early Temporary Occupancy by NGI)
 - Santos--Simulated Human (Rockwell collaborator)
- Projects Leveraged $\sim 10:1$ with Federal, Private Support

Be remarkable

UI BioVentures Center

- → Public-Private Partnership with Ryan Companies, City of Coralville
- **→**Two Wings
 - → BioVentures Center (2 floors; 35,000 gsf)
 - →Speculative Space (3 floors; 45,000 gsf)
 - +UI Commits to 10,000 gsf of Spec Space
- + Construction Schedule
 - **→**Start: November 2007
 - +Complete: October 2008

lows Centers for Enterprise

Age-related Macular Degeneration

- Leading cause of irreversible blindness in individuals over the age of 55; >50 million afflicted worldwide
 - 8 million individuals at high risk in the US; approximately 100,000 high risk in <u>Iowa</u>

EDUCATE

INNOVATE

Age-related Macular Degeneration

Consequences & Cost

Age-related deterioration of central vision

- Loss of independence
 & productivity
 (reading, ambulation, recognition)
 - Clinical depression
 (~30% of afflicted individuals)

 Economic cost - increasingly larger share of the \$68B spent on visual impairment in the US (~\$10B/yr UK; ~\$8B Australia)

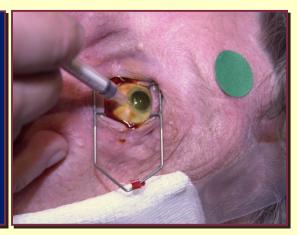

Age-related Macular Degeneration

Treatment

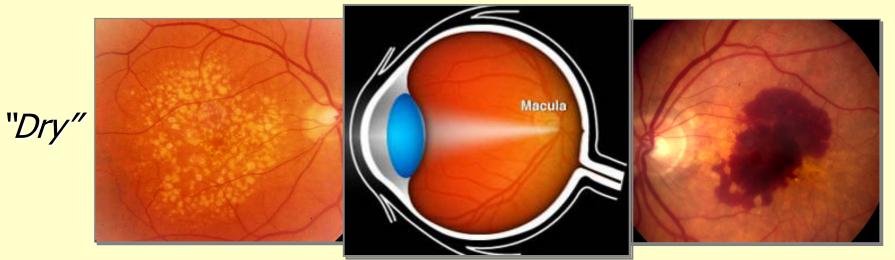

- Treatment is limited currently to "wet" AMD; visual improvement observed in ~30% of patients (monthly intraocular injections)
 - Wet market anticipated to be \$2.5B/yr by 2010
 - There are <u>no treatments</u> for early "dry" disease

Age-related Macular Degeneration

 Progressive deterioration of central vision is due to degeneration of the retinal <u>macula</u>

"Wet"

<u>Drusen</u> are the hallmark pathological indicators of early disease

EDUCATE

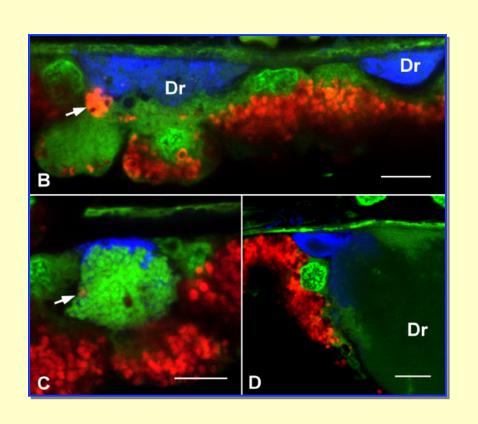

INNOVATE

lows Centers for Enterprise

AMD & Drusen Composition

Studies conducted over the past 15 years provided compelling evidence that aberrant regulation of the complement system plays a central role in the development of early AMD

<u>Iowa</u>

- Human eye donor repository
- IP activities (10 patent families & >75 active applications & issued patents)

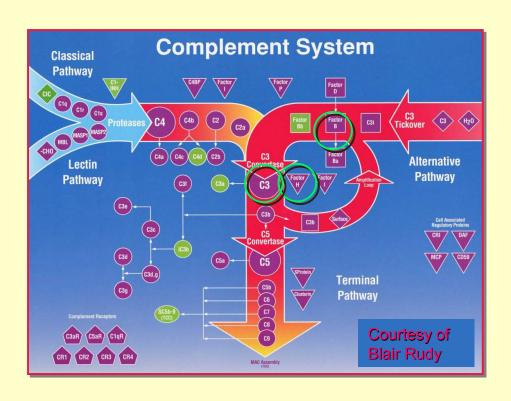

EDUCATE

INNOVATE

Age-related Macular Degeneration

Recent genetic discoveries have substantiated these findings & provided new insights related the underlying basis of AMD

Complement Genes & AMD

- CFH
- CFH point mutations
- CFHR1/CFHR3 deletion
 - CFB/C2
 - C3

EDUCATE

INNOVATE

Complement Factor H (CFH)

- Variations within the CFH gene are associated with ~50% of AMD
 - CFH is associated with AMD in all races studied (e.g. Europe, Australia, Russia, Spain, India, Asia)
 - One "risk" & two "protective" forms of CFH exist
 - The "protective" form of CFH is protective in all conditions (all races & diseases examined)
 - The CFH risk form is likely associated with other diseases (stroke, AZ, CAD, MI)

State of Iowa, UI & Optherion

Other ROI

- Majority of UI IP licensed & reimbursed (UIRF cost >\$600K)
 - UI equity position in Optherion
- \$15M NIH "R24" grant received (subcontracts with 8 institutions)
 - \$3.2M Optherion Research Agreement with UI
- 15-20 new UI employees funded by NIH & Optherion grants
 - 10-15 new Optherion employees to be hired in Iowa

lows Centers for Enterprise

Optherion

Lead Therapeutic Premise/Focus

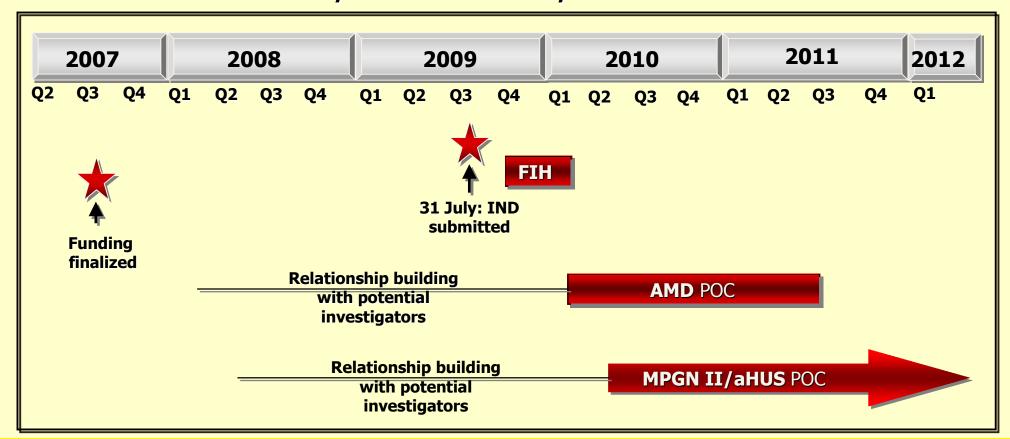

- Augmentation with recombinant "protective" CFH (rhCFH_{Protective}) to reestablish homeostatic regulation of the complement alternative pathway
- Immediate-term focus on IV administration of rhCFH_{Pprotective} for MPGNII & AMD
 - ✓ MPGNII: orphan drug opportunity with renal endpoint
 ✓ AMD: delay/prevent conversion to advanced disease
 - Pipeline development with additional Rx opportunities

Optherion

Therapeutic Development Plan

EDUCATE

INNOVATE

lowa Centers for Enterprise

Optherion - Summary

- Unique therapeutic & diagnostic play -- backed by compelling science & clinical data -- in a large & untapped dry AMD market
 - Risk mitigating factors include:
 - ✓ Robust IP position with expansion possibilities
 - ✓ Multiple shots on goal in multiple markets
 - ✓ Experienced management team
 - ✓ Early cash generating potential with diagnostics
 - ✓ Biologic therapeutic with clinical evidence of efficacy with fast-to-market therapeutic opportunity
 - \$1B-plus/yr revenue generating business
- Broader opportunities within other CFH- & complement-related diseases
